

Patent and Intellectual Property Research for Inventors and Companies

The Pearson Strategy Group assists creative companies and inventors by conducting efficient, actionable patent-related research. We work directly with you or can complement your attorney-client relationship while achieving effective results within your budget constraints.

Our services are scalable and provide affordable options for one-time or ongoing needs. We are experts in patent research and have the tools to conduct a thorough, professional-grade search. Our researchers are U.S.-based and our resources are worldwide.

We empower legal, R&D and engineering teams with facts, not hunches, that help them improve designs while minimizing risk of infringement.

Typical delivery is 5 to 10 business days, with faster times often available.

Most Frequent Research Requests

Our reports are backed by more than 10 years of patent research experience across many areas of technology, including electrical, mechanical and software segments.

- **Patentability**
- **Freedom to Operate**
- **Validity**
- **State of the Art** - identify future market trends and participants.
- **Patent Analytics** - assist your client with ideation, spot opportunities and identify threats.
- **Patent Alerts** - monitor key technologies, competitors and IP citations in near-real time.
